Important Note:
Set your PowerBook to "Stay awake when plugged in" in the portable control panel and plug in the PowerBook when using the PowerBook On-screen Commercial.

Getting Started: PowerBook Duo System On-screen Commercial.

Step 1: Getting your system ready.
• The on-screen commercial runs on all current Apple® Macintosh® computers with at least 2MB of memory and System 7.™
• If you're running the on-screen commercial on a Macintosh PowerBook™ Duo System choose 16 gray levels in the Monitors control panel.
(Note: the PowerBook On-screen Commercial has been optimized to play on grayscale displays, aviod using the PowerBook Duo System On-screen Commercial when the display is set to Black and White)
• If your system is running any other screen savers or applications, quit them.

Step 2: Installing the on-screen commercial.
• Insert the On-screen Commercial disk. Double-click the disk's icon to open it.
• Open the On-screen Commercial folder.
• Double-click the "Install On-screen Commercial" icon.
• A dialog box will ask where you want to install the on-screen commercial. Install it on your hard disk. If you have more than one hard disk, install it on your startup hard disk.
• A dialog box should appear that says the installation was successful. Click the OK button. If installation was not successful, try again.
• Click the Restart button.

Step 3: Setting your password.
If you want to prevent customers from inadvertently stopping the on-screen commercial and working with files on the computer, we suggest you create a password. Set the password as follows:
• After the system restarts, choose Apple Screensaver in the Application menu.
• Choose Screensaver Settings in the File menu.
• Enter the password of your choice.
The on-screen commercial will start in one minute. It will play continuously until you stop or quit the on-screen commercial.

Step 4: Stopping the on-screen commercial.
Stopping the on-screen commercial returns you to the Finder™ so you can run applications or show demonstrations.
• Press Command-. (Command-period) to interrupt the on-screen commercial.
• Type your password in the dialog box.
• The Finder will appear and you can work with other applications.
The on-screen commercial will start again after the system has been idle for one minute.

Step 5: Quitting the on-screen commercial.
If you need to install fonts or install other applications, you'll need to quit the on-screen commercial.
• To quit, press Command-Control-Q. The Finder will appear.
• To restart the on-screen commercial, either restart your system or double-click the On-screen Commercial application icon, which is in your System Folder.

If you have any problems installing or operating the on-screen commercial, call us at (408) 974-4549.
